

## Chopped Strand For Thermoset(BMC)

**F**ibtex™ Fiberglass chopped strands for the reinforcements of thermoset (BMC) is used as a reinforcement in thermoset molding compounds to produce molded parts for electrical, mechanical and chemical-resistant applications. Suitable resins include Polyester, BMC, etc.

### Specifications

- Available in E-Glass and C-Glass
- Filament diameter 11 and 13 microns
- Cut length - 3,4,5 and 6mm (3/32", 5/32", 3/16" and 1/4") Other cut

lengths on request.

- 20ft container loads about 15 metric tonnes (33,075 lbs)
