

Pipe Warp Tissue

Pipe wrap tissue is used as a base material for anti-corrosion wrapping on steel pipelines for oil or gas distribution. It's compatible with impregnating bitumen and coal tar enamel.

Technical Characteristics

Product Number	Density (g/m ²)	Binder Content (%)	Thickness (mm)	Moisturre content (%)	Width (mm)	Length per roll (meters)
PWT50	50	20	0.33	<1.0	250, 500 and 1000	2500
PWT60	60		0.35			2000
PWT90	90		0.40			1500
