

## Fiberglass Mesh

**Fiberglass mesh** is woven by C-glass or E-glass fiber yarn in plain or leno weave, and then treated by acrylic acid polymer or PVC. It is alkali-resistant, acid-resistant and anti-aging. As an ideal engineering material in construction, it is mainly used to reinforce cement, light wallboard, internal and external wall, marble, stone, wall materials, roofing, and gypsum and so on.

We can offer you with many choices.

- 1.Mesh size:** 2mmx2mm to 20mmx20mm, the normal mesh sizes are 4x4mm, 5x5mm, 4x5mm, 10x10mm etc.
  - 2.Width:** 0.1m to 2.2m.
  - 3.Roll length:** 10m to 400m.
  - 4.Unit weight:** 40g-800g/m<sup>2</sup>.
  - 5.Colours:** White, blue, green, yellow, red, orange, black, grey, pink etc.
  - 6.Softness:** Very soft, soft, semi-soft, semi-tough, tough and very tough
  - 7.Package:** Shrinkage film or plastic bag, then in carton or pallet.
  - 8.Capacity:** We can supply 4 million square meters per month.
  - 9.Certificate:** Passed ISO9002, CE and ITB test.
  - 10.Type:** Common mesh, half texturized and all texturized mesh.
- Your enquiry is warmly welcomed and treated with more attentions.
